

“ I chose Williamson Medical Center because of the amazing sense of culture I witnessed during my interview. Throughout my time as a resident, this has remained true amongst not only the pharmacy staff, but the entire hospital.

Everyone is willing to help anyone, no matter how big or how small the problem. Williamson's Pharmacy Residency Program offers a well-rounded experience ranging from pediatrics to palliative care. This creates a balanced program across all different aspects of patient care.

Furthermore, preceptors are very committed to residents' learning and truly want us to grow as young pharmacists. They are happy to answer questions, making me feel comfortable and eager to grow and develop my knowledge and skills. Offering only two positions, we are given the unique opportunity to build a close relationship as co-residents as well as having a personalized learning experience. Our preceptors are always open to feedback and looking for ways to improve the program. I truly believe Williamson Medical Center's Pharmacy Residency Program sets residents up for success in their future jobs or in their future specialized training.

Kelsie (Fadool) Morgan, PharmD
PGY1 Clinical Pharmacist Resident

“ The supportive and collaborative environment at Williamson Medical Center has made it the ideal place to complete a PGY1 pharmacy residency. One of the biggest reasons I chose this program was the people, and throughout my residency, that decision has continued to be reinforced. The pharmacy team has created an environment where I feel supported not only in my professional development and career goals, but also in my personal well-being. I have been surrounded by pharmacists who genuinely want to see me succeed, challenge me to grow, and are always willing to take the time to teach, provide feedback, and support me when I need it.

Williamson Medical Center also provides a diverse range of clinical experiences that has allowed me to develop my knowledge and skills across a variety of patient populations and practice areas. **This program provides opportunities to take ownership of patient care, make clinical recommendations, and gradually build the confidence and independence needed to practice as a pharmacist.**

Ultimately, I chose Williamson Medical because I wanted a residency program that would not only challenge me clinically, but also invest in me as a person and future pharmacist. I am grateful to get to train in an environment that pushes me outside of my comfort zone, encourages me to pursue my interests, and is helping me grow into a more confident and independent clinician. The people, experiences, and supportive culture at Williamson Medical have made this program feel like the right place for me to begin my career as a pharmacist.
